Building and Sustaining Partnerships with Higher Education Institutions (HEI)
Matt Farley, Campus Compact
May 7, 2019

What is the desired future state related to this priority? If known, what are the primary factors that influence it?

What are the HEI assets? (Local or otherwise) What departments at those HEI might be interested/invested in this issue? And Why?

What opportunities does our organization(s) have to for HEI students/faculty/staf? What are our strengths? Are we ready to partner?

How can we link this community priority to academic scholarship? What do we know of the current literature and practice?

What strategies can we use to build HEI ownership over their piece of the project? How does this compare to what we “normally” do?
